

## Motorized and Non-Motorized Trails within Potential Wilderness Areas

This table shows the current (as of August 2011) status of trails within the Potential Wilderness Areas on the Colville and the Okanogan-Wenatchee National Forests. The data is arranged by potential wilderness area name and then divided by whether the PWA includes any acres that are part of the preliminary wilderness recommendation included in the June 30, 2011 Proposed Action. The information is further broken down by the miles of motorized or non-motorized trail within that PWA.

This data is preliminary and draft. The location of preliminary wilderness recommendations may change as the plan revision process continues. The National Forests may make changes to trail status or location in the future.
